

The Provincial Forms Standardization Working Group (PFSWG) is leading the process to standardize forms that support the clinical business processes of the Regional Health Authorities (RHAs) and the provincial Electronic Medical Record (EMR) program, eDOCSNL.

Partners: RHAs, DHCS, NLCHI, provincial clinical programs, and clinical and health information management experts.

Provincial Forms Completed to Date (implementation in progress)

- Outpatient Specimen Collection Requisition (R0001JUL18)
- Provincial Form Request (R0002AUG18)

Provincial Forms Nearing Completion

- Diagnostic Imaging Requisitions
- Occupational Therapy Referral
- Opioid Patient Agreement and Opioid Therapy Termination Letter

Moving Forward

- Phase I of the Provincial Forms Standardization initiative ended March 31, 2019. Phase 2 includes a reassessment of priority forms for provincial standardization and implementation as well as the completion of forms currently in process. Emphasis continues to be on requisitions and referrals used by primary health care providers to initiate service on behalf of the patient.
- Processes for distributing and implementing approved provincial forms have been identified.
- Discussion continues regarding the requirements for a provincial forms repository.
