

eDOCSNL

ELECTRONIC MEDICAL RECORD

eDOCSNL is Newfoundland and Labrador's provincial electronic medical record (EMR) program which uses TELUS Health's Med Access EMR. Using the eDOCSNL EMR helps physicians with day-to-day clinical practices ranging from basic office support to enhanced patient management and decision-making.

One of the key advantages of enrolling in eDOCSNL is the real-time integration of a physician's patient records with patient information from other areas of the health care system such as laboratory data and medication profiles.

For more information about the eDOCSNL program or to enrol please visit www.edocsnl.ca or email info@edocsnl.ca
