ELECTRONIC MEDICAL RECORD

Introducing the Fall 2022 eDOCSNL Support Tour

Would you like to explore how your EMR experience can be improved? Do you want to learn time saving features and techniques that can make your practice more efficient? Is there a piece of EMR functionality that you would like to explore or issues you would like resolved?

eDOCSNL would like to support all users with getting the most value from the EMR. We will be offering personalized support sessions this fall on your terms and your schedule.

Please reach out to us at info@edocsnl.ca to arrange a visit. This visit can be tailored to your clinic's needs and we are flexible with how and when this support is delivered. We are open to your ideas as to what topics are covered during this session, from general support to enhanced functionality and mature use or we can simply spend some time in your clinic to address questions from providers and staff as you work. We know your time is very valuable and we will strive to meet your availability.

Thanks again, we are looking forward to serving you!
