

*New eDOCSNL NL Frailty – Cognitive Assessment Template

FPRP and eDOCSNL would like to let you know about a new **Cognitive Assessment** template now available in the Med Access EMR!

FPRP's Care of the Older Adult Frailty Continuing Professional Development Program has been ongoing since 2019. Program content is designed and delivered by an expert team of Care of the Elderly trained Family Physicians and Geriatricians from across the province. To build on this great work the Frailty team has begun collaborating with eDOCSNL on the development of EMR tools to support frailty work within Primary Care. The first outcome of this collaboration is the Cognitive Assessment template. This template is now available in all Med Access EMRs.

For instructions on locating and favoriting the **eDOCSNL NL Frailty – Cognitive Assessment template** click [here](#).

A deep dive on the template will be included in the next iteration of FPRP's Frailty education program (Frailty 5) coming in 2025. Stay tuned!
